	9-Factor Analysis							
		Score (1		Score				
Parameter	Weight	to 3)	Discount Impact	(-2 to 2)	<u>Adjustment</u>	Comment(s)		
Ability to Sell Interest	High	3	Increase	2		Members cannot transfer interest without consent of Majority-in-Interest of Members (i.e. Satellite); however, Satellite Management represented that Satellite has historically provided JV partners liquidity options by either purchasing stakes or finding other potential buyers/investors. Possibility of relocating facility may impact ability (and timelines) of selling interest.		
Cash Distributions	Moderate	2	Slight Increase	1		Cash Distribution based on ownership, however, distributable cash determined based on sole discretion of the Manager. i.e. Satellite.		
Ownership Risk	Moderate	2	Slight Decrease	-1		Limited risk since Satellite is majority/controlling member, and the facility is relatively mature with stable revenues.		
Agreement Term	Moderate	2	Neutral	0	0.0%	Term of the Agreement expected to be until the end of the LLC's existence.		
Historical Profits	Moderate	2	Neutral	0	0.0%	Positive EBITDA and EBIT for ~8 years with fluctuating margins; margins meaningfully positive when adjusting for management fees; upside potential given physical capacity for patient growth.		
Debt	Moderate	2	Neutral	0	0.0%	No significant debt.		
Diversification	Moderate	2	Increase	2	4.0%	Single center only in a particular geographical area; home program only.		
Management Motivation	Low	1	Neutral	0	0.0%	Motivation assumed to be profit-oriented, considering the Company is professionally managed.		
Control of Management	High	3	Increase	it Dis-		Minority members have very limited control legally, but practically, the envisioned JV members will have meaningful influence on facility operations. Matters such as change of business activity, change in Membership Interest (based on admission/withdrawal of members), tax elections, sale/merger and liquidation or dissolution of the Company, require consent of Super Majority-in-Interest, (i.e. Satellite). Notwithstanding, the business is highly regulated and would require adherence regardless of the party in control.
